

# Hybe

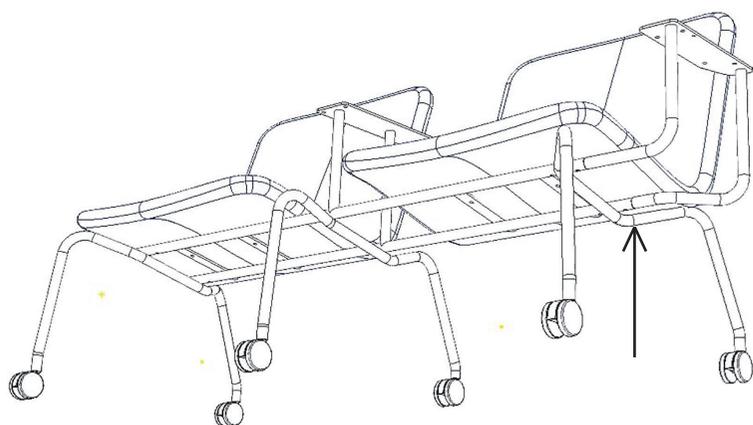

ASSEMBLY INSTRUCTION 039220

For more information, please visit [efg.se](http://efg.se).

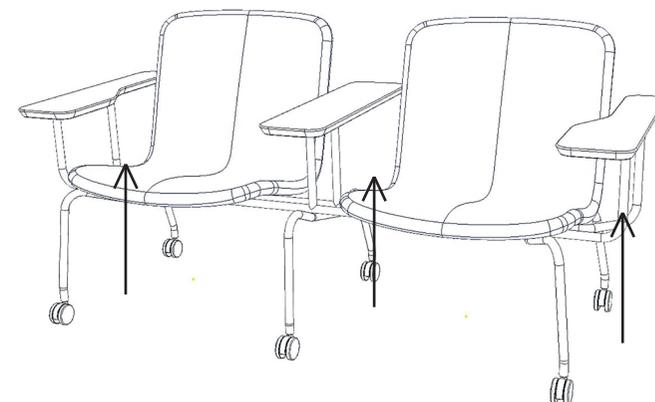

Assemble the armrests/side tables

Position the armrest(s) by sliding them into the tubes underneath the seat(s).

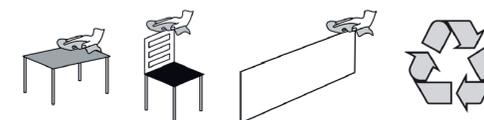

Secure them by screwing the M6x20 mm screws through the tubes into the armrest(s), 4 screws/armrest.

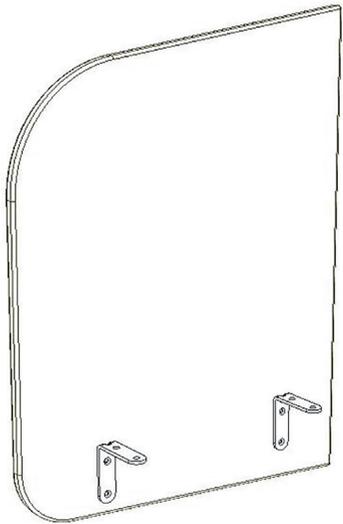

Assemble the armrest top(s) by screwing the M6x20 mm screws in the T-nuts from underneath. NOTE! If you are adding screens, don't tighten the screws until the screens are added.

The product contains one or more of following materials: Metal, plastic, wood, fabric, foam.

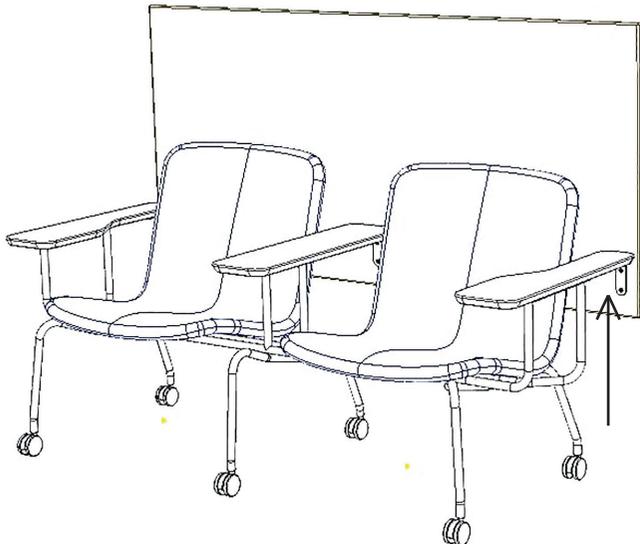

# Hybe assembly

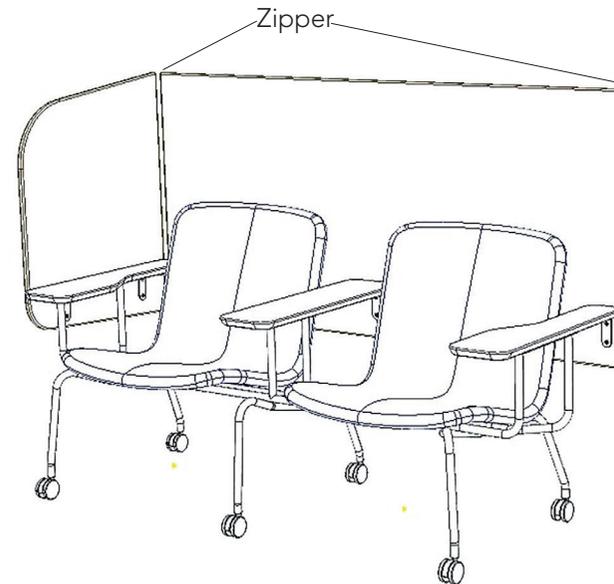

## Assemble the screens

Fasten the brackets onto the screens with the countersunk M6x20 mm screws. Two brackets for the side screens and two or three for the back screen.

Start to assemble the back screen. Use the M6x20 mm screws into the T-nuts underneath the armrest tops.

Continue assemble the side screens. Assemble the zipper in the corner and fasten the screen brackets with the M6x20 mm screws into two T-nuts underneath the armrest top and two tapered holes in the metal part. There are clearance holes in the armrest tops for these screws.

Finish the assembling by tightening the screws for the armrest tops.
