

Evo

Timeless in style, innovative in design

Evo is a wooden armchair that combines timeless, Scandinavian style with sustainable and innovative design. Evo is a timeless eye-catcher in every room for meetings, breaks or socializing.

Offering comfortable seating in a lounge, lobby or foyer, and in a reception area or office, Evo will stand out, or blend in.

Designed by Jonas Forsman. It is inspired by the classic, Scandinavian armchairs of the 50s, but that is the only thing classic about Evo. Timeless, natural wood in combination with the latest manufacturing technology, forms a unique piece of furniture, easy to fall in love with.

All finishes of wood and fabric colours can be combined.

The textile can be replaced if needed.

Evo is made of wood, in ash, oak or black-stained ash finishes. The chair is available with or without armrests.

Evo is sustainably designed, with few components. All parts can be replaced and recycled. The slim design results in low weight. The seat fabric is 100% recyclable polyester, and no foam or padding is used. The knitting technique used when making the seat minimises waste from production. The fabric can be replaced if needed. All this makes Evo a climate-friendly chair, sustainable over time.

Evo is certified by Möbelfakta, which means that it is sustainably produced based on quality, environment and social conditions. The fabric for Evo is eco-labeled with EU-Ecolabel (ecolabel.eu)

The seat and back are made of a single piece of 3D-knitted fabric. Colours Beige Melange and Black Melange.
