

Spine

STOOL

Spine is a modular and ergonomic platform of hybrid chairs. The platform construction means that it can be easily rebuilt into all the variants within the series, and be adapted to varying uses throughout the office. Spine can alternate between flexible stool, meeting chair and dedicated office chair for focused work. The seating mechanism provides 360 degrees of freedom in the sitting movement, for active sitting. Spine's layer-by-layer design means that all parts of the chair are separable and can be replaced or updated as needed, and that the parts are made from pure, recyclable materials.

Spine stool is suitable for flexible seating with high requirements on ergonomics. It can be equipped with a "spine", back post to easily convert to other variants in the Spine family.

MODEL	Savo Spine stool	
ACCESSORIES	– Polished aluminium swivel base – Interval-braked castors – Alternative colours on all-round castors – Alternative colour on seams
